

AP MEDIA APPLICATION

NEWS, SOCIAL MEDIA & VIRTUAL INTELLIGENCE PLATFORM

Product Requirements Design Concept Document

Prepared By: Ramesh Babu P.

1. PRODUCT NAME: AP MEDIA

A next-generation AI-Powered News, Social Media, Teasers (Tiktok like Feature), Messaging (WhatsApp like Feature), Debate, Investigation, Knowledge Sharing, Charity Activities, Story Writing, Civic Participation and Digital Democracy Platform available on:

- Android Application
- iOS Application
- Responsive Web Application
- Smart Android TV Application
- Future Connected Devices Ecosystems

1. PHILOSOPHY

Vasudhaiva Kutumbakam
"The World is One Family"

Satyameva Jayate
"Truth Alone Triumphs"

Core Principles

- Fact-Based Journalism
- Evidence-Based Publishing
- Science-Based Decision Making
- Logic-Based Discussions
- Practical Problem Solving
- Democratic Participation
- Transparency
- Accountability
- Human Dignity
- Freedom of Expression with Responsibility
- Community Participation

- Public Interest First

The platform shall be designed such that:

FACT DRIVES THE PLATFORM, NOT ALGORITHMS.

Content ranking shall prioritize:

- Truth
- Evidence
- Authenticity
- Public Value
- Credibility
- Expert Validation
- Community Trust
- Reach
- Circulation
- Public Support

rather than merely:

- Virality
- Popularity
- Engagement Manipulation
- Clickbait

1. VISION STATEMENT

To build the world's most advanced, trusted, democratic, transparent, evidence-driven and AI-powered media ecosystem where citizens, experts, reporters, institutions, governments, businesses and organizations collaborate to create, verify, discuss and distribute factual information for the benefit of humanity.

1. MISSION

- Democratize journalism.
- Enable community-driven reporting.

- Build the world's largest verified information network.
 - Create transparent public discourse.
 - Promote evidence-based decision making.
 - Empower reporters and citizens equally.
 - Use AI responsibly for truth discovery and fact verification.
 - Create a sustainable ecosystem supporting journalism, social causes, education, governance and public participation.
-

1. SUPPORTED PLATFORMS

Mobile

- Android App
- iOS App

Web

- Responsive Web Portal
- Progressive Web Application (PWA)

Television

- Smart Android TV Application
-

1. USER TYPES

Public User

Registered User

Verified User

Premium User

Content Creator

Reporter

Bureau

Moderator

Sub Editor

Editor

Manager

Sub Admin

Admin

Super Admin

1. ADMINISTRATIVE HIERARCHY

SUPER ADMIN (GLOBAL)

Complete control across the entire platform globally.

Authority Includes:

- Global Governance
- User Management
- Finance Management
- HR Management
- Staff Management
- Reporter Management
- Bureau Management
- Moderator Management
- Content Control
- Advertisement Management
- Sponsorship Management
- Wallet Management

- Legal Management
- Platform Security
- Country Management
- State Management
- District Management
- AI Configuration
- Analytics Configuration

Can:

- Promote Users
- Demote Users
- Increase User Values
- Decrease User Values
- Remove Users
- Suspend Users
- Ban Users
- Block Operations
- Freeze Wallets
- Disable Modules
- Shutdown Platform
- Restore Platform

ADMIN (COUNTRY LEVEL)

Country-wide powers.

Can control:

- Entire country operations
- Users
