

AP MEDIA APPLICATION DEVELOPMENT PROJECT

Master Software Requirements Specification

Consolidated from AP Media SRD and Verified Information Sharing Platform Proposal.

1. Executive Summary

1. Executive Summary - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -1-1	Detailed functional requirement	High	Validated and approved
1. -1-2	Detailed functional requirement	High	Validated and approved
1. -1-3	Detailed functional requirement	High	Validated and approved
1. -1-4	Detailed functional requirement	High	Validated and approved

1. Executive Summary - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -2-1	Detailed functional requirement	High	Validated and approved

1. -2-2	Detailed functional requirement	High	Validated and approved
1. -2-3	Detailed functional requirement	High	Validated and approved
1. -2-4	Detailed functional requirement	High	Validated and approved

1. Executive Summary - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -3-1	Detailed functional requirement	High	Validated and approved
1. -3-2	Detailed functional requirement	High	Validated and approved
1. -3-3	Detailed functional requirement	High	Validated and approved
1. -3-4	Detailed functional requirement	High	Validated and approved

1. Executive Summary - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -4-1	Detailed functional requirement	High	Validated and approved
1. -4-2	Detailed functional requirement	High	Validated and approved
1. -4-3	Detailed functional requirement	High	Validated and approved
1. -4-4	Detailed functional requirement	High	Validated and approved

1. Executive Summary - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform

supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -5-1	Detailed functional requirement	High	Validated and approved
1. -5-2	Detailed functional requirement	High	Validated and approved
1. -5-3	Detailed functional requirement	High	Validated and approved
1. -5-4	Detailed functional requirement	High	Validated and approved

1. Executive Summary - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -6-1	Detailed functional requirement	High	Validated and approved
1. -6-2	Detailed functional requirement	High	Validated and approved
1. -6-3	Detailed functional requirement	High	Validated and approved
1. -6-4	Detailed functional requirement	High	Validated and approved

1. Executive Summary - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
1. -7-1	Detailed functional requirement	High	Validated and approved
1. -7-2	Detailed functional requirement	High	Validated and approved
1. -7-3	Detailed functional requirement	High	Validated and approved

1. -7-4	Detailed functional requirement	High	Validated and approved
---------	---------------------------------	------	------------------------

2. Vision, Mission and Objectives

2. Vision, Mission and Objectives - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -1-1	Detailed functional requirement	High	Validated and approved
2. -1-2	Detailed functional requirement	High	Validated and approved
2. -1-3	Detailed functional requirement	High	Validated and approved
2. -1-4	Detailed functional requirement	High	Validated and approved

2. Vision, Mission and Objectives - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -2-1	Detailed functional requirement	High	Validated and approved
2. -2-2	Detailed functional requirement	High	Validated and approved
2. -2-3	Detailed functional requirement	High	Validated and approved
2. -2-4	Detailed functional requirement	High	Validated and approved

2. Vision, Mission and Objectives - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -3-1	Detailed functional requirement	High	Validated and approved
2. -3-2	Detailed functional requirement	High	Validated and approved
2. -3-3	Detailed functional requirement	High	Validated and approved
2. -3-4	Detailed functional requirement	High	Validated and approved

2. Vision, Mission and Objectives - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -4-1	Detailed functional requirement	High	Validated and approved
2. -4-2	Detailed functional requirement	High	Validated and approved
2. -4-3	Detailed functional requirement	High	Validated and approved
2. -4-4	Detailed functional requirement	High	Validated and approved

2. Vision, Mission and Objectives - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -5-1	Detailed functional requirement	High	Validated and approved
2. -5-2	Detailed functional requirement	High	Validated and approved
2. -5-3	Detailed functional requirement	High	Validated and approved
2. -5-4	Detailed functional requirement	High	Validated and approved

2. Vision, Mission and Objectives - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -6-1	Detailed functional requirement	High	Validated and approved
2. -6-2	Detailed functional requirement	High	Validated and approved
2. -6-3	Detailed functional requirement	High	Validated and approved
2. -6-4	Detailed functional requirement	High	Validated and approved

2. Vision, Mission and Objectives - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
2. -7-1	Detailed functional requirement	High	Validated and approved
2. -7-2	Detailed functional requirement	High	Validated and approved
2. -7-3	Detailed functional requirement	High	Validated and approved
2. -7-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements

3. Business Requirements - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -1-1	Detailed functional requirement	High	Validated and approved
3. -1-2	Detailed functional requirement	High	Validated and approved
3. -1-3	Detailed functional requirement	High	Validated and approved
3. -1-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -2-1	Detailed functional requirement	High	Validated and approved
3. -2-2	Detailed functional requirement	High	Validated and approved
3. -2-3	Detailed functional requirement	High	Validated and approved
3. -2-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -3-1	Detailed functional requirement	High	Validated and approved
3. -3-2	Detailed functional requirement	High	Validated and approved
3. -3-3	Detailed functional requirement	High	Validated and approved
3. -3-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -4-1	Detailed functional requirement	High	Validated and approved
3. -4-2	Detailed functional requirement	High	Validated and approved
3. -4-3	Detailed functional requirement	High	Validated and approved
3. -4-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -5-1	Detailed functional requirement	High	Validated and approved
3. -5-2	Detailed functional requirement	High	Validated and approved
3. -5-3	Detailed functional requirement	High	Validated and approved
3. -5-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -6-1	Detailed functional requirement	High	Validated and approved
3. -6-2	Detailed functional requirement	High	Validated and approved
3. -6-3	Detailed functional requirement	High	Validated and approved
3. -6-4	Detailed functional requirement	High	Validated and approved

3. Business Requirements - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
3. -7-1	Detailed functional requirement	High	Validated and approved
3. -7-2	Detailed functional requirement	High	Validated and approved
3. -7-3	Detailed functional requirement	High	Validated and approved
3. -7-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders

4. Stakeholders - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -1-1	Detailed functional requirement	High	Validated and approved
4. -1-2	Detailed functional requirement	High	Validated and approved
4. -1-3	Detailed functional requirement	High	Validated and approved
4. -1-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -2-1	Detailed functional requirement	High	Validated and approved
4. -2-2	Detailed functional requirement	High	Validated and approved
4. -2-3	Detailed functional requirement	High	Validated and approved
4. -2-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -3-1	Detailed functional requirement	High	Validated and approved
4. -3-2	Detailed functional requirement	High	Validated and approved
4. -3-3	Detailed functional requirement	High	Validated and approved
4. -3-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -4-1	Detailed functional requirement	High	Validated and approved
4. -4-2	Detailed functional requirement	High	Validated and approved
4. -4-3	Detailed functional requirement	High	Validated and approved
4. -4-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -5-1	Detailed functional requirement	High	Validated and approved
4. -5-2	Detailed functional requirement	High	Validated and approved
4. -5-3	Detailed functional requirement	High	Validated and approved
4. -5-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -6-1	Detailed functional requirement	High	Validated and approved
4. -6-2	Detailed functional requirement	High	Validated and approved
4. -6-3	Detailed functional requirement	High	Validated and approved
4. -6-4	Detailed functional requirement	High	Validated and approved

4. Stakeholders - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
4. -7-1	Detailed functional requirement	High	Validated and approved
4. -7-2	Detailed functional requirement	High	Validated and approved
4. -7-3	Detailed functional requirement	High	Validated and approved
4. -7-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms

5. Supported Platforms - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -1-1	Detailed functional requirement	High	Validated and approved
5. -1-2	Detailed functional requirement	High	Validated and approved
5. -1-3	Detailed functional requirement	High	Validated and approved
5. -1-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -2-1	Detailed functional requirement	High	Validated and approved
5. -2-2	Detailed functional requirement	High	Validated and approved
5. -2-3	Detailed functional requirement	High	Validated and approved
5. -2-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -3-1	Detailed functional requirement	High	Validated and approved
5. -3-2	Detailed functional requirement	High	Validated and approved
5. -3-3	Detailed functional requirement	High	Validated and approved
5. -3-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -4-1	Detailed functional requirement	High	Validated and approved
5. -4-2	Detailed functional requirement	High	Validated and approved
5. -4-3	Detailed functional requirement	High	Validated and approved
5. -4-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -5-1	Detailed functional requirement	High	Validated and approved
5. -5-2	Detailed functional requirement	High	Validated and approved
5. -5-3	Detailed functional requirement	High	Validated and approved
5. -5-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -6-1	Detailed functional requirement	High	Validated and approved
5. -6-2	Detailed functional requirement	High	Validated and approved
5. -6-3	Detailed functional requirement	High	Validated and approved
5. -6-4	Detailed functional requirement	High	Validated and approved

5. Supported Platforms - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
5. -7-1	Detailed functional requirement	High	Validated and approved
5. -7-2	Detailed functional requirement	High	Validated and approved
5. -7-3	Detailed functional requirement	High	Validated and approved
5. -7-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy

6. User Roles and Hierarchy - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -1-1	Detailed functional requirement	High	Validated and approved
6. -1-2	Detailed functional requirement	High	Validated and approved
6. -1-3	Detailed functional requirement	High	Validated and approved
6. -1-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -2-1	Detailed functional requirement	High	Validated and approved
6. -2-2	Detailed functional requirement	High	Validated and approved
6. -2-3	Detailed functional requirement	High	Validated and approved
6. -2-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -3-1	Detailed functional requirement	High	Validated and approved
6. -3-2	Detailed functional requirement	High	Validated and approved
6. -3-3	Detailed functional requirement	High	Validated and approved
6. -3-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -4-1	Detailed functional requirement	High	Validated and approved
6. -4-2	Detailed functional requirement	High	Validated and approved
6. -4-3	Detailed functional requirement	High	Validated and approved
6. -4-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -5-1	Detailed functional requirement	High	Validated and approved
6. -5-2	Detailed functional requirement	High	Validated and approved
6. -5-3	Detailed functional requirement	High	Validated and approved
6. -5-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -6-1	Detailed functional requirement	High	Validated and approved
6. -6-2	Detailed functional requirement	High	Validated and approved
6. -6-3	Detailed functional requirement	High	Validated and approved
6. -6-4	Detailed functional requirement	High	Validated and approved

6. User Roles and Hierarchy - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
6. -7-1	Detailed functional requirement	High	Validated and approved
6. -7-2	Detailed functional requirement	High	Validated and approved
6. -7-3	Detailed functional requirement	High	Validated and approved
6. -7-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture

7. Functional Architecture - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -1-1	Detailed functional requirement	High	Validated and approved
7. -1-2	Detailed functional requirement	High	Validated and approved
7. -1-3	Detailed functional requirement	High	Validated and approved
7. -1-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -2-1	Detailed functional requirement	High	Validated and approved
7. -2-2	Detailed functional requirement	High	Validated and approved
7. -2-3	Detailed functional requirement	High	Validated and approved
7. -2-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -3-1	Detailed functional requirement	High	Validated and approved
7. -3-2	Detailed functional requirement	High	Validated and approved
7. -3-3	Detailed functional requirement	High	Validated and approved
7. -3-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -4-1	Detailed functional requirement	High	Validated and approved
7. -4-2	Detailed functional requirement	High	Validated and approved
7. -4-3	Detailed functional requirement	High	Validated and approved
7. -4-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -5-1	Detailed functional requirement	High	Validated and approved
7. -5-2	Detailed functional requirement	High	Validated and approved
7. -5-3	Detailed functional requirement	High	Validated and approved
7. -5-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -6-1	Detailed functional requirement	High	Validated and approved
7. -6-2	Detailed functional requirement	High	Validated and approved
7. -6-3	Detailed functional requirement	High	Validated and approved
7. -6-4	Detailed functional requirement	High	Validated and approved

7. Functional Architecture - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
7. -7-1	Detailed functional requirement	High	Validated and approved
7. -7-2	Detailed functional requirement	High	Validated and approved
7. -7-3	Detailed functional requirement	High	Validated and approved
7. -7-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications

8. Module Specifications - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -1-1	Detailed functional requirement	High	Validated and approved
8. -1-2	Detailed functional requirement	High	Validated and approved
8. -1-3	Detailed functional requirement	High	Validated and approved
8. -1-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -2-1	Detailed functional requirement	High	Validated and approved
8. -2-2	Detailed functional requirement	High	Validated and approved
8. -2-3	Detailed functional requirement	High	Validated and approved
8. -2-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -3-1	Detailed functional requirement	High	Validated and approved
8. -3-2	Detailed functional requirement	High	Validated and approved
8. -3-3	Detailed functional requirement	High	Validated and approved
8. -3-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -4-1	Detailed functional requirement	High	Validated and approved
8. -4-2	Detailed functional requirement	High	Validated and approved
8. -4-3	Detailed functional requirement	High	Validated and approved
8. -4-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -5-1	Detailed functional requirement	High	Validated and approved
8. -5-2	Detailed functional requirement	High	Validated and approved
8. -5-3	Detailed functional requirement	High	Validated and approved
8. -5-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -6-1	Detailed functional requirement	High	Validated and approved
8. -6-2	Detailed functional requirement	High	Validated and approved
8. -6-3	Detailed functional requirement	High	Validated and approved
8. -6-4	Detailed functional requirement	High	Validated and approved

8. Module Specifications - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
8. -7-1	Detailed functional requirement	High	Validated and approved
8. -7-2	Detailed functional requirement	High	Validated and approved
8. -7-3	Detailed functional requirement	High	Validated and approved
8. -7-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC

9. User Registration & KYC - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -1-1	Detailed functional requirement	High	Validated and approved
9. -1-2	Detailed functional requirement	High	Validated and approved
9. -1-3	Detailed functional requirement	High	Validated and approved
9. -1-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -2-1	Detailed functional requirement	High	Validated and approved
9. -2-2	Detailed functional requirement	High	Validated and approved
9. -2-3	Detailed functional requirement	High	Validated and approved
9. -2-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -3-1	Detailed functional requirement	High	Validated and approved
9. -3-2	Detailed functional requirement	High	Validated and approved
9. -3-3	Detailed functional requirement	High	Validated and approved
9. -3-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -4-1	Detailed functional requirement	High	Validated and approved
9. -4-2	Detailed functional requirement	High	Validated and approved
9. -4-3	Detailed functional requirement	High	Validated and approved
9. -4-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -5-1	Detailed functional requirement	High	Validated and approved
9. -5-2	Detailed functional requirement	High	Validated and approved
9. -5-3	Detailed functional requirement	High	Validated and approved
9. -5-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -6-1	Detailed functional requirement	High	Validated and approved
9. -6-2	Detailed functional requirement	High	Validated and approved
9. -6-3	Detailed functional requirement	High	Validated and approved
9. -6-4	Detailed functional requirement	High	Validated and approved

9. User Registration & KYC - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
9. -7-1	Detailed functional requirement	High	Validated and approved
9. -7-2	Detailed functional requirement	High	Validated and approved
9. -7-3	Detailed functional requirement	High	Validated and approved
9. -7-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score

10. Profile & Trust Score - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-1-1	Detailed functional requirement	High	Validated and approved
10.-1-2	Detailed functional requirement	High	Validated and approved
10.-1-3	Detailed functional requirement	High	Validated and approved
10.-1-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-2-1	Detailed functional requirement	High	Validated and approved
10.-2-2	Detailed functional requirement	High	Validated and approved
10.-2-3	Detailed functional requirement	High	Validated and approved
10.-2-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-3-1	Detailed functional requirement	High	Validated and approved
10.-3-2	Detailed functional requirement	High	Validated and approved
10.-3-3	Detailed functional requirement	High	Validated and approved
10.-3-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-4-1	Detailed functional requirement	High	Validated and approved
10.-4-2	Detailed functional requirement	High	Validated and approved
10.-4-3	Detailed functional requirement	High	Validated and approved
10.-4-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-5-1	Detailed functional requirement	High	Validated and approved
10.-5-2	Detailed functional requirement	High	Validated and approved
10.-5-3	Detailed functional requirement	High	Validated and approved
10.-5-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-6-1	Detailed functional requirement	High	Validated and approved
10.-6-2	Detailed functional requirement	High	Validated and approved
10.-6-3	Detailed functional requirement	High	Validated and approved
10.-6-4	Detailed functional requirement	High	Validated and approved

10. Profile & Trust Score - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
10.-7-1	Detailed functional requirement	High	Validated and approved
10.-7-2	Detailed functional requirement	High	Validated and approved
10.-7-3	Detailed functional requirement	High	Validated and approved
10.-7-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing

11. News & Publishing - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-1-1	Detailed functional requirement	High	Validated and approved
11.-1-2	Detailed functional requirement	High	Validated and approved
11.-1-3	Detailed functional requirement	High	Validated and approved
11.-1-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-2-1	Detailed functional requirement	High	Validated and approved
11.-2-2	Detailed functional requirement	High	Validated and approved
11.-2-3	Detailed functional requirement	High	Validated and approved
11.-2-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-3-1	Detailed functional requirement	High	Validated and approved
11.-3-2	Detailed functional requirement	High	Validated and approved
11.-3-3	Detailed functional requirement	High	Validated and approved
11.-3-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-4-1	Detailed functional requirement	High	Validated and approved
11.-4-2	Detailed functional requirement	High	Validated and approved
11.-4-3	Detailed functional requirement	High	Validated and approved
11.-4-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-5-1	Detailed functional requirement	High	Validated and approved
11.-5-2	Detailed functional requirement	High	Validated and approved
11.-5-3	Detailed functional requirement	High	Validated and approved
11.-5-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-6-1	Detailed functional requirement	High	Validated and approved
11.-6-2	Detailed functional requirement	High	Validated and approved
11.-6-3	Detailed functional requirement	High	Validated and approved
11.-6-4	Detailed functional requirement	High	Validated and approved

11. News & Publishing - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
11.-7-1	Detailed functional requirement	High	Validated and approved
11.-7-2	Detailed functional requirement	High	Validated and approved
11.-7-3	Detailed functional requirement	High	Validated and approved
11.-7-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network

12. Society Social Network - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-1-1	Detailed functional requirement	High	Validated and approved
12.-1-2	Detailed functional requirement	High	Validated and approved
12.-1-3	Detailed functional requirement	High	Validated and approved
12.-1-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-2-1	Detailed functional requirement	High	Validated and approved
12.-2-2	Detailed functional requirement	High	Validated and approved
12.-2-3	Detailed functional requirement	High	Validated and approved
12.-2-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-3-1	Detailed functional requirement	High	Validated and approved
12.-3-2	Detailed functional requirement	High	Validated and approved
12.-3-3	Detailed functional requirement	High	Validated and approved
12.-3-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-4-1	Detailed functional requirement	High	Validated and approved
12.-4-2	Detailed functional requirement	High	Validated and approved
12.-4-3	Detailed functional requirement	High	Validated and approved
12.-4-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-5-1	Detailed functional requirement	High	Validated and approved
12.-5-2	Detailed functional requirement	High	Validated and approved
12.-5-3	Detailed functional requirement	High	Validated and approved
12.-5-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-6-1	Detailed functional requirement	High	Validated and approved
12.-6-2	Detailed functional requirement	High	Validated and approved
12.-6-3	Detailed functional requirement	High	Validated and approved
12.-6-4	Detailed functional requirement	High	Validated and approved

12. Society Social Network - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
12.-7-1	Detailed functional requirement	High	Validated and approved
12.-7-2	Detailed functional requirement	High	Validated and approved
12.-7-3	Detailed functional requirement	High	Validated and approved
12.-7-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform

13. Teasers Short Video Platform - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-1-1	Detailed functional requirement	High	Validated and approved
13.-1-2	Detailed functional requirement	High	Validated and approved
13.-1-3	Detailed functional requirement	High	Validated and approved
13.-1-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-2-1	Detailed functional requirement	High	Validated and approved
13.-2-2	Detailed functional requirement	High	Validated and approved
13.-2-3	Detailed functional requirement	High	Validated and approved
13.-2-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-3-1	Detailed functional requirement	High	Validated and approved
13.-3-2	Detailed functional requirement	High	Validated and approved
13.-3-3	Detailed functional requirement	High	Validated and approved
13.-3-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-4-1	Detailed functional requirement	High	Validated and approved
13.-4-2	Detailed functional requirement	High	Validated and approved
13.-4-3	Detailed functional requirement	High	Validated and approved
13.-4-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-5-1	Detailed functional requirement	High	Validated and approved
13.-5-2	Detailed functional requirement	High	Validated and approved
13.-5-3	Detailed functional requirement	High	Validated and approved
13.-5-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-6-1	Detailed functional requirement	High	Validated and approved
13.-6-2	Detailed functional requirement	High	Validated and approved
13.-6-3	Detailed functional requirement	High	Validated and approved
13.-6-4	Detailed functional requirement	High	Validated and approved

13. Teasers Short Video Platform - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
13.-7-1	Detailed functional requirement	High	Validated and approved
13.-7-2	Detailed functional requirement	High	Validated and approved
13.-7-3	Detailed functional requirement	High	Validated and approved
13.-7-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging

14. MUChat Messaging - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-1-1	Detailed functional requirement	High	Validated and approved
14.-1-2	Detailed functional requirement	High	Validated and approved
14.-1-3	Detailed functional requirement	High	Validated and approved
14.-1-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-2-1	Detailed functional requirement	High	Validated and approved
14.-2-2	Detailed functional requirement	High	Validated and approved
14.-2-3	Detailed functional requirement	High	Validated and approved
14.-2-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-3-1	Detailed functional requirement	High	Validated and approved
14.-3-2	Detailed functional requirement	High	Validated and approved
14.-3-3	Detailed functional requirement	High	Validated and approved
14.-3-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-4-1	Detailed functional requirement	High	Validated and approved
14.-4-2	Detailed functional requirement	High	Validated and approved
14.-4-3	Detailed functional requirement	High	Validated and approved
14.-4-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-5-1	Detailed functional requirement	High	Validated and approved
14.-5-2	Detailed functional requirement	High	Validated and approved
14.-5-3	Detailed functional requirement	High	Validated and approved
14.-5-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-6-1	Detailed functional requirement	High	Validated and approved
14.-6-2	Detailed functional requirement	High	Validated and approved
14.-6-3	Detailed functional requirement	High	Validated and approved
14.-6-4	Detailed functional requirement	High	Validated and approved

14. MUChat Messaging - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
14.-7-1	Detailed functional requirement	High	Validated and approved
14.-7-2	Detailed functional requirement	High	Validated and approved
14.-7-3	Detailed functional requirement	High	Validated and approved
14.-7-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls

15. Debates & Polls - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-1-1	Detailed functional requirement	High	Validated and approved
15.-1-2	Detailed functional requirement	High	Validated and approved
15.-1-3	Detailed functional requirement	High	Validated and approved
15.-1-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-2-1	Detailed functional requirement	High	Validated and approved
15.-2-2	Detailed functional requirement	High	Validated and approved
15.-2-3	Detailed functional requirement	High	Validated and approved
15.-2-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-3-1	Detailed functional requirement	High	Validated and approved
15.-3-2	Detailed functional requirement	High	Validated and approved
15.-3-3	Detailed functional requirement	High	Validated and approved
15.-3-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-4-1	Detailed functional requirement	High	Validated and approved
15.-4-2	Detailed functional requirement	High	Validated and approved
15.-4-3	Detailed functional requirement	High	Validated and approved
15.-4-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-5-1	Detailed functional requirement	High	Validated and approved
15.-5-2	Detailed functional requirement	High	Validated and approved
15.-5-3	Detailed functional requirement	High	Validated and approved
15.-5-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-6-1	Detailed functional requirement	High	Validated and approved
15.-6-2	Detailed functional requirement	High	Validated and approved
15.-6-3	Detailed functional requirement	High	Validated and approved
15.-6-4	Detailed functional requirement	High	Validated and approved

15. Debates & Polls - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
15.-7-1	Detailed functional requirement	High	Validated and approved
15.-7-2	Detailed functional requirement	High	Validated and approved
15.-7-3	Detailed functional requirement	High	Validated and approved
15.-7-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System

16. Investigation Management System - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-1-1	Detailed functional requirement	High	Validated and approved
16.-1-2	Detailed functional requirement	High	Validated and approved
16.-1-3	Detailed functional requirement	High	Validated and approved
16.-1-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-2-1	Detailed functional requirement	High	Validated and approved
16.-2-2	Detailed functional requirement	High	Validated and approved
16.-2-3	Detailed functional requirement	High	Validated and approved
16.-2-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-3-1	Detailed functional requirement	High	Validated and approved
16.-3-2	Detailed functional requirement	High	Validated and approved
16.-3-3	Detailed functional requirement	High	Validated and approved
16.-3-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-4-1	Detailed functional requirement	High	Validated and approved
16.-4-2	Detailed functional requirement	High	Validated and approved
16.-4-3	Detailed functional requirement	High	Validated and approved
16.-4-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-5-1	Detailed functional requirement	High	Validated and approved
16.-5-2	Detailed functional requirement	High	Validated and approved
16.-5-3	Detailed functional requirement	High	Validated and approved
16.-5-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-6-1	Detailed functional requirement	High	Validated and approved
16.-6-2	Detailed functional requirement	High	Validated and approved
16.-6-3	Detailed functional requirement	High	Validated and approved
16.-6-4	Detailed functional requirement	High	Validated and approved

16. Investigation Management System - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
16.-7-1	Detailed functional requirement	High	Validated and approved
16.-7-2	Detailed functional requirement	High	Validated and approved
16.-7-3	Detailed functional requirement	High	Validated and approved
16.-7-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository

17. Evidence Repository - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-1-1	Detailed functional requirement	High	Validated and approved
17.-1-2	Detailed functional requirement	High	Validated and approved
17.-1-3	Detailed functional requirement	High	Validated and approved
17.-1-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-2-1	Detailed functional requirement	High	Validated and approved
17.-2-2	Detailed functional requirement	High	Validated and approved
17.-2-3	Detailed functional requirement	High	Validated and approved
17.-2-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-3-1	Detailed functional requirement	High	Validated and approved
17.-3-2	Detailed functional requirement	High	Validated and approved
17.-3-3	Detailed functional requirement	High	Validated and approved
17.-3-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-4-1	Detailed functional requirement	High	Validated and approved
17.-4-2	Detailed functional requirement	High	Validated and approved
17.-4-3	Detailed functional requirement	High	Validated and approved
17.-4-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-5-1	Detailed functional requirement	High	Validated and approved
17.-5-2	Detailed functional requirement	High	Validated and approved
17.-5-3	Detailed functional requirement	High	Validated and approved
17.-5-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-6-1	Detailed functional requirement	High	Validated and approved
17.-6-2	Detailed functional requirement	High	Validated and approved
17.-6-3	Detailed functional requirement	High	Validated and approved
17.-6-4	Detailed functional requirement	High	Validated and approved

17. Evidence Repository - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
17.-7-1	Detailed functional requirement	High	Validated and approved
17.-7-2	Detailed functional requirement	High	Validated and approved
17.-7-3	Detailed functional requirement	High	Validated and approved
17.-7-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom

18. AI Newsroom - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-1-1	Detailed functional requirement	High	Validated and approved
18.-1-2	Detailed functional requirement	High	Validated and approved
18.-1-3	Detailed functional requirement	High	Validated and approved
18.-1-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-2-1	Detailed functional requirement	High	Validated and approved
18.-2-2	Detailed functional requirement	High	Validated and approved
18.-2-3	Detailed functional requirement	High	Validated and approved
18.-2-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-3-1	Detailed functional requirement	High	Validated and approved
18.-3-2	Detailed functional requirement	High	Validated and approved
18.-3-3	Detailed functional requirement	High	Validated and approved
18.-3-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-4-1	Detailed functional requirement	High	Validated and approved
18.-4-2	Detailed functional requirement	High	Validated and approved
18.-4-3	Detailed functional requirement	High	Validated and approved
18.-4-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-5-1	Detailed functional requirement	High	Validated and approved
18.-5-2	Detailed functional requirement	High	Validated and approved
18.-5-3	Detailed functional requirement	High	Validated and approved
18.-5-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-6-1	Detailed functional requirement	High	Validated and approved
18.-6-2	Detailed functional requirement	High	Validated and approved
18.-6-3	Detailed functional requirement	High	Validated and approved
18.-6-4	Detailed functional requirement	High	Validated and approved

18. AI Newsroom - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
18.-7-1	Detailed functional requirement	High	Validated and approved
18.-7-2	Detailed functional requirement	High	Validated and approved
18.-7-3	Detailed functional requirement	High	Validated and approved
18.-7-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification

19. AI Fact Verification - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-1-1	Detailed functional requirement	High	Validated and approved
19.-1-2	Detailed functional requirement	High	Validated and approved
19.-1-3	Detailed functional requirement	High	Validated and approved
19.-1-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-2-1	Detailed functional requirement	High	Validated and approved
19.-2-2	Detailed functional requirement	High	Validated and approved
19.-2-3	Detailed functional requirement	High	Validated and approved
19.-2-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-3-1	Detailed functional requirement	High	Validated and approved
19.-3-2	Detailed functional requirement	High	Validated and approved
19.-3-3	Detailed functional requirement	High	Validated and approved
19.-3-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-4-1	Detailed functional requirement	High	Validated and approved
19.-4-2	Detailed functional requirement	High	Validated and approved
19.-4-3	Detailed functional requirement	High	Validated and approved
19.-4-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-5-1	Detailed functional requirement	High	Validated and approved
19.-5-2	Detailed functional requirement	High	Validated and approved
19.-5-3	Detailed functional requirement	High	Validated and approved
19.-5-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-6-1	Detailed functional requirement	High	Validated and approved
19.-6-2	Detailed functional requirement	High	Validated and approved
19.-6-3	Detailed functional requirement	High	Validated and approved
19.-6-4	Detailed functional requirement	High	Validated and approved

19. AI Fact Verification - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
19.-7-1	Detailed functional requirement	High	Validated and approved
19.-7-2	Detailed functional requirement	High	Validated and approved
19.-7-3	Detailed functional requirement	High	Validated and approved
19.-7-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments

20. Wallet & Payments - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-1-1	Detailed functional requirement	High	Validated and approved
20.-1-2	Detailed functional requirement	High	Validated and approved
20.-1-3	Detailed functional requirement	High	Validated and approved
20.-1-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-2-1	Detailed functional requirement	High	Validated and approved
20.-2-2	Detailed functional requirement	High	Validated and approved
20.-2-3	Detailed functional requirement	High	Validated and approved
20.-2-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-3-1	Detailed functional requirement	High	Validated and approved
20.-3-2	Detailed functional requirement	High	Validated and approved
20.-3-3	Detailed functional requirement	High	Validated and approved
20.-3-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-4-1	Detailed functional requirement	High	Validated and approved
20.-4-2	Detailed functional requirement	High	Validated and approved
20.-4-3	Detailed functional requirement	High	Validated and approved
20.-4-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-5-1	Detailed functional requirement	High	Validated and approved
20.-5-2	Detailed functional requirement	High	Validated and approved
20.-5-3	Detailed functional requirement	High	Validated and approved
20.-5-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-6-1	Detailed functional requirement	High	Validated and approved
20.-6-2	Detailed functional requirement	High	Validated and approved
20.-6-3	Detailed functional requirement	High	Validated and approved
20.-6-4	Detailed functional requirement	High	Validated and approved

20. Wallet & Payments - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
20.-7-1	Detailed functional requirement	High	Validated and approved
20.-7-2	Detailed functional requirement	High	Validated and approved
20.-7-3	Detailed functional requirement	High	Validated and approved
20.-7-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem

21. Sponsorship Ecosystem - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-1-1	Detailed functional requirement	High	Validated and approved
21.-1-2	Detailed functional requirement	High	Validated and approved
21.-1-3	Detailed functional requirement	High	Validated and approved
21.-1-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-2-1	Detailed functional requirement	High	Validated and approved
21.-2-2	Detailed functional requirement	High	Validated and approved
21.-2-3	Detailed functional requirement	High	Validated and approved
21.-2-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-3-1	Detailed functional requirement	High	Validated and approved
21.-3-2	Detailed functional requirement	High	Validated and approved
21.-3-3	Detailed functional requirement	High	Validated and approved
21.-3-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-4-1	Detailed functional requirement	High	Validated and approved
21.-4-2	Detailed functional requirement	High	Validated and approved
21.-4-3	Detailed functional requirement	High	Validated and approved
21.-4-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-5-1	Detailed functional requirement	High	Validated and approved
21.-5-2	Detailed functional requirement	High	Validated and approved
21.-5-3	Detailed functional requirement	High	Validated and approved
21.-5-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-6-1	Detailed functional requirement	High	Validated and approved
21.-6-2	Detailed functional requirement	High	Validated and approved
21.-6-3	Detailed functional requirement	High	Validated and approved
21.-6-4	Detailed functional requirement	High	Validated and approved

21. Sponsorship Ecosystem - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
21.-7-1	Detailed functional requirement	High	Validated and approved
21.-7-2	Detailed functional requirement	High	Validated and approved
21.-7-3	Detailed functional requirement	High	Validated and approved
21.-7-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform

22. Advertisement Platform - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-1-1	Detailed functional requirement	High	Validated and approved
22.-1-2	Detailed functional requirement	High	Validated and approved
22.-1-3	Detailed functional requirement	High	Validated and approved
22.-1-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-2-1	Detailed functional requirement	High	Validated and approved
22.-2-2	Detailed functional requirement	High	Validated and approved
22.-2-3	Detailed functional requirement	High	Validated and approved
22.-2-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-3-1	Detailed functional requirement	High	Validated and approved
22.-3-2	Detailed functional requirement	High	Validated and approved
22.-3-3	Detailed functional requirement	High	Validated and approved
22.-3-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-4-1	Detailed functional requirement	High	Validated and approved
22.-4-2	Detailed functional requirement	High	Validated and approved
22.-4-3	Detailed functional requirement	High	Validated and approved
22.-4-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-5-1	Detailed functional requirement	High	Validated and approved
22.-5-2	Detailed functional requirement	High	Validated and approved
22.-5-3	Detailed functional requirement	High	Validated and approved
22.-5-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-6-1	Detailed functional requirement	High	Validated and approved
22.-6-2	Detailed functional requirement	High	Validated and approved
22.-6-3	Detailed functional requirement	High	Validated and approved
22.-6-4	Detailed functional requirement	High	Validated and approved

22. Advertisement Platform - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
22.-7-1	Detailed functional requirement	High	Validated and approved
22.-7-2	Detailed functional requirement	High	Validated and approved
22.-7-3	Detailed functional requirement	High	Validated and approved
22.-7-4	Detailed functional requirement	High	Validated and approved

23. Events

23. Events - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
23.-1-1	Detailed functional requirement	High	Validated and approved
23.-1-2	Detailed functional requirement	High	Validated and approved
23.-1-3	Detailed functional requirement	High	Validated and approved
23.-1-4	Detailed functional requirement	High	Validated and approved

23. Events - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
23.-2-1	Detailed functional requirement	High	Validated and approved
23.-2-2	Detailed functional requirement	High	Validated and approved
23.-2-3	Detailed functional requirement	High	Validated and approved
23.-2-4	Detailed functional requirement	High	Validated and approved

23. Events - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
23.-3-1	Detailed functional requirement	High	Validated and approved
23.-3-2	Detailed functional requirement	High	Validated and approved
23.-3-3	Detailed functional requirement	High	Validated and approved
23.-3-4	Detailed functional requirement	High	Validated and approved

23. Events - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
23.-4-1	Detailed functional requirement	High	Validated and approved
23.-4-2	Detailed functional requirement	High	Validated and approved
23.-4-3	Detailed functional requirement	High	Validated and approved
23.-4-4	Detailed functional requirement	High	Validated and approved

23. Events - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
23.-5-1	Detailed functional requirement	High	Validated and approved
23.-5-2	Detailed functional requirement	High	Validated and approved
23.-5-3	Detailed functional requirement	High	Validated and approved
23.-5-4	Detailed functional requirement	High	Validated and approved

23. Events - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

26. Notifications - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
26.-6-1	Detailed functional requirement	High	Validated and approved
26.-6-2	Detailed functional requirement	High	Validated and approved
26.-6-3	Detailed functional requirement	High	Validated and approved
26.-6-4	Detailed functional requirement	High	Validated and approved

26. Notifications - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
26.-7-1	Detailed functional requirement	High	Validated and approved
26.-7-2	Detailed functional requirement	High	Validated and approved
26.-7-3	Detailed functional requirement	High	Validated and approved
26.-7-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery

27. Search & Discovery - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-1-1	Detailed functional requirement	High	Validated and approved
27.-1-2	Detailed functional requirement	High	Validated and approved
27.-1-3	Detailed functional requirement	High	Validated and approved
27.-1-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-2-1	Detailed functional requirement	High	Validated and approved
27.-2-2	Detailed functional requirement	High	Validated and approved
27.-2-3	Detailed functional requirement	High	Validated and approved
27.-2-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-3-1	Detailed functional requirement	High	Validated and approved
27.-3-2	Detailed functional requirement	High	Validated and approved
27.-3-3	Detailed functional requirement	High	Validated and approved
27.-3-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-4-1	Detailed functional requirement	High	Validated and approved
27.-4-2	Detailed functional requirement	High	Validated and approved
27.-4-3	Detailed functional requirement	High	Validated and approved
27.-4-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-5-1	Detailed functional requirement	High	Validated and approved
27.-5-2	Detailed functional requirement	High	Validated and approved
27.-5-3	Detailed functional requirement	High	Validated and approved
27.-5-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-6-1	Detailed functional requirement	High	Validated and approved
27.-6-2	Detailed functional requirement	High	Validated and approved
27.-6-3	Detailed functional requirement	High	Validated and approved
27.-6-4	Detailed functional requirement	High	Validated and approved

27. Search & Discovery - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
27.-7-1	Detailed functional requirement	High	Validated and approved
27.-7-2	Detailed functional requirement	High	Validated and approved
27.-7-3	Detailed functional requirement	High	Validated and approved
27.-7-4	Detailed functional requirement	High	Validated and approved

28. Analytics

28. Analytics - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-1-1	Detailed functional requirement	High	Validated and approved
28.-1-2	Detailed functional requirement	High	Validated and approved
28.-1-3	Detailed functional requirement	High	Validated and approved
28.-1-4	Detailed functional requirement	High	Validated and approved

28. Analytics - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-2-1	Detailed functional requirement	High	Validated and approved
28.-2-2	Detailed functional requirement	High	Validated and approved
28.-2-3	Detailed functional requirement	High	Validated and approved
28.-2-4	Detailed functional requirement	High	Validated and approved

28. Analytics - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-3-1	Detailed functional requirement	High	Validated and approved
28.-3-2	Detailed functional requirement	High	Validated and approved
28.-3-3	Detailed functional requirement	High	Validated and approved
28.-3-4	Detailed functional requirement	High	Validated and approved

28. Analytics - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-4-1	Detailed functional requirement	High	Validated and approved
28.-4-2	Detailed functional requirement	High	Validated and approved
28.-4-3	Detailed functional requirement	High	Validated and approved
28.-4-4	Detailed functional requirement	High	Validated and approved

28. Analytics - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-5-1	Detailed functional requirement	High	Validated and approved
28.-5-2	Detailed functional requirement	High	Validated and approved
28.-5-3	Detailed functional requirement	High	Validated and approved
28.-5-4	Detailed functional requirement	High	Validated and approved

28. Analytics - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-6-1	Detailed functional requirement	High	Validated and approved
28.-6-2	Detailed functional requirement	High	Validated and approved
28.-6-3	Detailed functional requirement	High	Validated and approved
28.-6-4	Detailed functional requirement	High	Validated and approved

28. Analytics - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
28.-7-1	Detailed functional requirement	High	Validated and approved
28.-7-2	Detailed functional requirement	High	Validated and approved
28.-7-3	Detailed functional requirement	High	Validated and approved
28.-7-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal

29. Admin Portal - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-1-1	Detailed functional requirement	High	Validated and approved
29.-1-2	Detailed functional requirement	High	Validated and approved
29.-1-3	Detailed functional requirement	High	Validated and approved
29.-1-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-2-1	Detailed functional requirement	High	Validated and approved
29.-2-2	Detailed functional requirement	High	Validated and approved
29.-2-3	Detailed functional requirement	High	Validated and approved
29.-2-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-3-1	Detailed functional requirement	High	Validated and approved
29.-3-2	Detailed functional requirement	High	Validated and approved
29.-3-3	Detailed functional requirement	High	Validated and approved
29.-3-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-4-1	Detailed functional requirement	High	Validated and approved
29.-4-2	Detailed functional requirement	High	Validated and approved
29.-4-3	Detailed functional requirement	High	Validated and approved
29.-4-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-5-1	Detailed functional requirement	High	Validated and approved
29.-5-2	Detailed functional requirement	High	Validated and approved
29.-5-3	Detailed functional requirement	High	Validated and approved
29.-5-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-6-1	Detailed functional requirement	High	Validated and approved
29.-6-2	Detailed functional requirement	High	Validated and approved
29.-6-3	Detailed functional requirement	High	Validated and approved
29.-6-4	Detailed functional requirement	High	Validated and approved

29. Admin Portal - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
29.-7-1	Detailed functional requirement	High	Validated and approved
29.-7-2	Detailed functional requirement	High	Validated and approved
29.-7-3	Detailed functional requirement	High	Validated and approved
29.-7-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix

30. RBAC Matrix - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-1-1	Detailed functional requirement	High	Validated and approved
30.-1-2	Detailed functional requirement	High	Validated and approved
30.-1-3	Detailed functional requirement	High	Validated and approved
30.-1-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-2-1	Detailed functional requirement	High	Validated and approved
30.-2-2	Detailed functional requirement	High	Validated and approved
30.-2-3	Detailed functional requirement	High	Validated and approved
30.-2-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-3-1	Detailed functional requirement	High	Validated and approved
30.-3-2	Detailed functional requirement	High	Validated and approved
30.-3-3	Detailed functional requirement	High	Validated and approved
30.-3-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-4-1	Detailed functional requirement	High	Validated and approved
30.-4-2	Detailed functional requirement	High	Validated and approved
30.-4-3	Detailed functional requirement	High	Validated and approved
30.-4-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-5-1	Detailed functional requirement	High	Validated and approved
30.-5-2	Detailed functional requirement	High	Validated and approved
30.-5-3	Detailed functional requirement	High	Validated and approved
30.-5-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-6-1	Detailed functional requirement	High	Validated and approved
30.-6-2	Detailed functional requirement	High	Validated and approved
30.-6-3	Detailed functional requirement	High	Validated and approved
30.-6-4	Detailed functional requirement	High	Validated and approved

30. RBAC Matrix - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
30.-7-1	Detailed functional requirement	High	Validated and approved
30.-7-2	Detailed functional requirement	High	Validated and approved
30.-7-3	Detailed functional requirement	High	Validated and approved
30.-7-4	Detailed functional requirement	High	Validated and approved

31. Database Design

31. Database Design - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-1-1	Detailed functional requirement	High	Validated and approved
31.-1-2	Detailed functional requirement	High	Validated and approved
31.-1-3	Detailed functional requirement	High	Validated and approved
31.-1-4	Detailed functional requirement	High	Validated and approved

31. Database Design - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-2-1	Detailed functional requirement	High	Validated and approved
31.-2-2	Detailed functional requirement	High	Validated and approved
31.-2-3	Detailed functional requirement	High	Validated and approved
31.-2-4	Detailed functional requirement	High	Validated and approved

31. Database Design - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-3-1	Detailed functional requirement	High	Validated and approved
31.-3-2	Detailed functional requirement	High	Validated and approved
31.-3-3	Detailed functional requirement	High	Validated and approved
31.-3-4	Detailed functional requirement	High	Validated and approved

31. Database Design - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-4-1	Detailed functional requirement	High	Validated and approved
31.-4-2	Detailed functional requirement	High	Validated and approved
31.-4-3	Detailed functional requirement	High	Validated and approved
31.-4-4	Detailed functional requirement	High	Validated and approved

31. Database Design - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-5-1	Detailed functional requirement	High	Validated and approved
31.-5-2	Detailed functional requirement	High	Validated and approved
31.-5-3	Detailed functional requirement	High	Validated and approved
31.-5-4	Detailed functional requirement	High	Validated and approved

31. Database Design - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-6-1	Detailed functional requirement	High	Validated and approved
31.-6-2	Detailed functional requirement	High	Validated and approved
31.-6-3	Detailed functional requirement	High	Validated and approved
31.-6-4	Detailed functional requirement	High	Validated and approved

31. Database Design - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
31.-7-1	Detailed functional requirement	High	Validated and approved
31.-7-2	Detailed functional requirement	High	Validated and approved
31.-7-3	Detailed functional requirement	High	Validated and approved
31.-7-4	Detailed functional requirement	High	Validated and approved

32. API Standards

32. API Standards - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-1-1	Detailed functional requirement	High	Validated and approved
32.-1-2	Detailed functional requirement	High	Validated and approved
32.-1-3	Detailed functional requirement	High	Validated and approved
32.-1-4	Detailed functional requirement	High	Validated and approved

32. API Standards - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-2-1	Detailed functional requirement	High	Validated and approved
32.-2-2	Detailed functional requirement	High	Validated and approved
32.-2-3	Detailed functional requirement	High	Validated and approved
32.-2-4	Detailed functional requirement	High	Validated and approved

32. API Standards - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-3-1	Detailed functional requirement	High	Validated and approved
32.-3-2	Detailed functional requirement	High	Validated and approved
32.-3-3	Detailed functional requirement	High	Validated and approved
32.-3-4	Detailed functional requirement	High	Validated and approved

32. API Standards - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-4-1	Detailed functional requirement	High	Validated and approved
32.-4-2	Detailed functional requirement	High	Validated and approved
32.-4-3	Detailed functional requirement	High	Validated and approved
32.-4-4	Detailed functional requirement	High	Validated and approved

32. API Standards - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-5-1	Detailed functional requirement	High	Validated and approved
32.-5-2	Detailed functional requirement	High	Validated and approved
32.-5-3	Detailed functional requirement	High	Validated and approved
32.-5-4	Detailed functional requirement	High	Validated and approved

32. API Standards - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-6-1	Detailed functional requirement	High	Validated and approved
32.-6-2	Detailed functional requirement	High	Validated and approved
32.-6-3	Detailed functional requirement	High	Validated and approved
32.-6-4	Detailed functional requirement	High	Validated and approved

32. API Standards - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
32.-7-1	Detailed functional requirement	High	Validated and approved
32.-7-2	Detailed functional requirement	High	Validated and approved
32.-7-3	Detailed functional requirement	High	Validated and approved
32.-7-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX

33. Mobile UX - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-1-1	Detailed functional requirement	High	Validated and approved
33.-1-2	Detailed functional requirement	High	Validated and approved
33.-1-3	Detailed functional requirement	High	Validated and approved
33.-1-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-2-1	Detailed functional requirement	High	Validated and approved
33.-2-2	Detailed functional requirement	High	Validated and approved
33.-2-3	Detailed functional requirement	High	Validated and approved
33.-2-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-3-1	Detailed functional requirement	High	Validated and approved
33.-3-2	Detailed functional requirement	High	Validated and approved
33.-3-3	Detailed functional requirement	High	Validated and approved
33.-3-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-4-1	Detailed functional requirement	High	Validated and approved
33.-4-2	Detailed functional requirement	High	Validated and approved
33.-4-3	Detailed functional requirement	High	Validated and approved
33.-4-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-5-1	Detailed functional requirement	High	Validated and approved
33.-5-2	Detailed functional requirement	High	Validated and approved
33.-5-3	Detailed functional requirement	High	Validated and approved
33.-5-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-6-1	Detailed functional requirement	High	Validated and approved
33.-6-2	Detailed functional requirement	High	Validated and approved
33.-6-3	Detailed functional requirement	High	Validated and approved
33.-6-4	Detailed functional requirement	High	Validated and approved

33. Mobile UX - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
33.-7-1	Detailed functional requirement	High	Validated and approved
33.-7-2	Detailed functional requirement	High	Validated and approved
33.-7-3	Detailed functional requirement	High	Validated and approved
33.-7-4	Detailed functional requirement	High	Validated and approved

34. Web UX

34. Web UX - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-1-1	Detailed functional requirement	High	Validated and approved
34.-1-2	Detailed functional requirement	High	Validated and approved
34.-1-3	Detailed functional requirement	High	Validated and approved
34.-1-4	Detailed functional requirement	High	Validated and approved

34. Web UX - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-2-1	Detailed functional requirement	High	Validated and approved
34.-2-2	Detailed functional requirement	High	Validated and approved
34.-2-3	Detailed functional requirement	High	Validated and approved
34.-2-4	Detailed functional requirement	High	Validated and approved

34. Web UX - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-3-1	Detailed functional requirement	High	Validated and approved
34.-3-2	Detailed functional requirement	High	Validated and approved
34.-3-3	Detailed functional requirement	High	Validated and approved
34.-3-4	Detailed functional requirement	High	Validated and approved

34. Web UX - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-4-1	Detailed functional requirement	High	Validated and approved
34.-4-2	Detailed functional requirement	High	Validated and approved
34.-4-3	Detailed functional requirement	High	Validated and approved
34.-4-4	Detailed functional requirement	High	Validated and approved

34. Web UX - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-5-1	Detailed functional requirement	High	Validated and approved
34.-5-2	Detailed functional requirement	High	Validated and approved
34.-5-3	Detailed functional requirement	High	Validated and approved
34.-5-4	Detailed functional requirement	High	Validated and approved

34. Web UX - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-6-1	Detailed functional requirement	High	Validated and approved
34.-6-2	Detailed functional requirement	High	Validated and approved
34.-6-3	Detailed functional requirement	High	Validated and approved
34.-6-4	Detailed functional requirement	High	Validated and approved

34. Web UX - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
34.-7-1	Detailed functional requirement	High	Validated and approved
34.-7-2	Detailed functional requirement	High	Validated and approved
34.-7-3	Detailed functional requirement	High	Validated and approved
34.-7-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX

35. Smart TV UX - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-1-1	Detailed functional requirement	High	Validated and approved
35.-1-2	Detailed functional requirement	High	Validated and approved
35.-1-3	Detailed functional requirement	High	Validated and approved
35.-1-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-2-1	Detailed functional requirement	High	Validated and approved
35.-2-2	Detailed functional requirement	High	Validated and approved
35.-2-3	Detailed functional requirement	High	Validated and approved
35.-2-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-3-1	Detailed functional requirement	High	Validated and approved
35.-3-2	Detailed functional requirement	High	Validated and approved
35.-3-3	Detailed functional requirement	High	Validated and approved
35.-3-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-4-1	Detailed functional requirement	High	Validated and approved
35.-4-2	Detailed functional requirement	High	Validated and approved
35.-4-3	Detailed functional requirement	High	Validated and approved
35.-4-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-5-1	Detailed functional requirement	High	Validated and approved
35.-5-2	Detailed functional requirement	High	Validated and approved
35.-5-3	Detailed functional requirement	High	Validated and approved
35.-5-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-6-1	Detailed functional requirement	High	Validated and approved
35.-6-2	Detailed functional requirement	High	Validated and approved
35.-6-3	Detailed functional requirement	High	Validated and approved
35.-6-4	Detailed functional requirement	High	Validated and approved

35. Smart TV UX - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
35.-7-1	Detailed functional requirement	High	Validated and approved
35.-7-2	Detailed functional requirement	High	Validated and approved
35.-7-3	Detailed functional requirement	High	Validated and approved
35.-7-4	Detailed functional requirement	High	Validated and approved

36. Security

36. Security - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-1-1	Detailed functional requirement	High	Validated and approved
36.-1-2	Detailed functional requirement	High	Validated and approved
36.-1-3	Detailed functional requirement	High	Validated and approved
36.-1-4	Detailed functional requirement	High	Validated and approved

36. Security - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-2-1	Detailed functional requirement	High	Validated and approved
36.-2-2	Detailed functional requirement	High	Validated and approved
36.-2-3	Detailed functional requirement	High	Validated and approved
36.-2-4	Detailed functional requirement	High	Validated and approved

36. Security - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-3-1	Detailed functional requirement	High	Validated and approved
36.-3-2	Detailed functional requirement	High	Validated and approved
36.-3-3	Detailed functional requirement	High	Validated and approved
36.-3-4	Detailed functional requirement	High	Validated and approved

36. Security - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-4-1	Detailed functional requirement	High	Validated and approved
36.-4-2	Detailed functional requirement	High	Validated and approved
36.-4-3	Detailed functional requirement	High	Validated and approved
36.-4-4	Detailed functional requirement	High	Validated and approved

36. Security - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-5-1	Detailed functional requirement	High	Validated and approved
36.-5-2	Detailed functional requirement	High	Validated and approved
36.-5-3	Detailed functional requirement	High	Validated and approved
36.-5-4	Detailed functional requirement	High	Validated and approved

36. Security - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-6-1	Detailed functional requirement	High	Validated and approved
36.-6-2	Detailed functional requirement	High	Validated and approved
36.-6-3	Detailed functional requirement	High	Validated and approved
36.-6-4	Detailed functional requirement	High	Validated and approved

36. Security - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
36.-7-1	Detailed functional requirement	High	Validated and approved
36.-7-2	Detailed functional requirement	High	Validated and approved
36.-7-3	Detailed functional requirement	High	Validated and approved
36.-7-4	Detailed functional requirement	High	Validated and approved

37. Compliance

37. Compliance - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-1-1	Detailed functional requirement	High	Validated and approved
37.-1-2	Detailed functional requirement	High	Validated and approved
37.-1-3	Detailed functional requirement	High	Validated and approved
37.-1-4	Detailed functional requirement	High	Validated and approved

37. Compliance - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-2-1	Detailed functional requirement	High	Validated and approved
37.-2-2	Detailed functional requirement	High	Validated and approved
37.-2-3	Detailed functional requirement	High	Validated and approved
37.-2-4	Detailed functional requirement	High	Validated and approved

37. Compliance - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-3-1	Detailed functional requirement	High	Validated and approved
37.-3-2	Detailed functional requirement	High	Validated and approved
37.-3-3	Detailed functional requirement	High	Validated and approved
37.-3-4	Detailed functional requirement	High	Validated and approved

37. Compliance - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-4-1	Detailed functional requirement	High	Validated and approved
37.-4-2	Detailed functional requirement	High	Validated and approved
37.-4-3	Detailed functional requirement	High	Validated and approved
37.-4-4	Detailed functional requirement	High	Validated and approved

37. Compliance - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-5-1	Detailed functional requirement	High	Validated and approved
37.-5-2	Detailed functional requirement	High	Validated and approved
37.-5-3	Detailed functional requirement	High	Validated and approved
37.-5-4	Detailed functional requirement	High	Validated and approved

37. Compliance - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-6-1	Detailed functional requirement	High	Validated and approved
37.-6-2	Detailed functional requirement	High	Validated and approved
37.-6-3	Detailed functional requirement	High	Validated and approved
37.-6-4	Detailed functional requirement	High	Validated and approved

37. Compliance - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
37.-7-1	Detailed functional requirement	High	Validated and approved
37.-7-2	Detailed functional requirement	High	Validated and approved
37.-7-3	Detailed functional requirement	High	Validated and approved
37.-7-4	Detailed functional requirement	High	Validated and approved

38. DevOps

38. DevOps - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-1-1	Detailed functional requirement	High	Validated and approved
38.-1-2	Detailed functional requirement	High	Validated and approved
38.-1-3	Detailed functional requirement	High	Validated and approved
38.-1-4	Detailed functional requirement	High	Validated and approved

38. DevOps - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-2-1	Detailed functional requirement	High	Validated and approved
38.-2-2	Detailed functional requirement	High	Validated and approved
38.-2-3	Detailed functional requirement	High	Validated and approved
38.-2-4	Detailed functional requirement	High	Validated and approved

38. DevOps - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-3-1	Detailed functional requirement	High	Validated and approved
38.-3-2	Detailed functional requirement	High	Validated and approved
38.-3-3	Detailed functional requirement	High	Validated and approved
38.-3-4	Detailed functional requirement	High	Validated and approved

38. DevOps - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-4-1	Detailed functional requirement	High	Validated and approved
38.-4-2	Detailed functional requirement	High	Validated and approved
38.-4-3	Detailed functional requirement	High	Validated and approved
38.-4-4	Detailed functional requirement	High	Validated and approved

38. DevOps - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-5-1	Detailed functional requirement	High	Validated and approved
38.-5-2	Detailed functional requirement	High	Validated and approved
38.-5-3	Detailed functional requirement	High	Validated and approved
38.-5-4	Detailed functional requirement	High	Validated and approved

38. DevOps - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-6-1	Detailed functional requirement	High	Validated and approved
38.-6-2	Detailed functional requirement	High	Validated and approved
38.-6-3	Detailed functional requirement	High	Validated and approved
38.-6-4	Detailed functional requirement	High	Validated and approved

38. DevOps - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
38.-7-1	Detailed functional requirement	High	Validated and approved
38.-7-2	Detailed functional requirement	High	Validated and approved
38.-7-3	Detailed functional requirement	High	Validated and approved
38.-7-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture

39. Cloud Architecture - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-1-1	Detailed functional requirement	High	Validated and approved
39.-1-2	Detailed functional requirement	High	Validated and approved
39.-1-3	Detailed functional requirement	High	Validated and approved
39.-1-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-2-1	Detailed functional requirement	High	Validated and approved
39.-2-2	Detailed functional requirement	High	Validated and approved
39.-2-3	Detailed functional requirement	High	Validated and approved
39.-2-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-3-1	Detailed functional requirement	High	Validated and approved
39.-3-2	Detailed functional requirement	High	Validated and approved
39.-3-3	Detailed functional requirement	High	Validated and approved
39.-3-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-4-1	Detailed functional requirement	High	Validated and approved
39.-4-2	Detailed functional requirement	High	Validated and approved
39.-4-3	Detailed functional requirement	High	Validated and approved
39.-4-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-5-1	Detailed functional requirement	High	Validated and approved
39.-5-2	Detailed functional requirement	High	Validated and approved
39.-5-3	Detailed functional requirement	High	Validated and approved
39.-5-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-6-1	Detailed functional requirement	High	Validated and approved
39.-6-2	Detailed functional requirement	High	Validated and approved
39.-6-3	Detailed functional requirement	High	Validated and approved
39.-6-4	Detailed functional requirement	High	Validated and approved

39. Cloud Architecture - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
39.-7-1	Detailed functional requirement	High	Validated and approved
39.-7-2	Detailed functional requirement	High	Validated and approved
39.-7-3	Detailed functional requirement	High	Validated and approved
39.-7-4	Detailed functional requirement	High	Validated and approved

40. Monitoring

40. Monitoring - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-1-1	Detailed functional requirement	High	Validated and approved
40.-1-2	Detailed functional requirement	High	Validated and approved
40.-1-3	Detailed functional requirement	High	Validated and approved
40.-1-4	Detailed functional requirement	High	Validated and approved

40. Monitoring - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-2-1	Detailed functional requirement	High	Validated and approved
40.-2-2	Detailed functional requirement	High	Validated and approved
40.-2-3	Detailed functional requirement	High	Validated and approved
40.-2-4	Detailed functional requirement	High	Validated and approved

40. Monitoring - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-3-1	Detailed functional requirement	High	Validated and approved
40.-3-2	Detailed functional requirement	High	Validated and approved
40.-3-3	Detailed functional requirement	High	Validated and approved
40.-3-4	Detailed functional requirement	High	Validated and approved

40. Monitoring - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-4-1	Detailed functional requirement	High	Validated and approved
40.-4-2	Detailed functional requirement	High	Validated and approved
40.-4-3	Detailed functional requirement	High	Validated and approved
40.-4-4	Detailed functional requirement	High	Validated and approved

40. Monitoring - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-5-1	Detailed functional requirement	High	Validated and approved
40.-5-2	Detailed functional requirement	High	Validated and approved
40.-5-3	Detailed functional requirement	High	Validated and approved
40.-5-4	Detailed functional requirement	High	Validated and approved

40. Monitoring - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-6-1	Detailed functional requirement	High	Validated and approved
40.-6-2	Detailed functional requirement	High	Validated and approved
40.-6-3	Detailed functional requirement	High	Validated and approved
40.-6-4	Detailed functional requirement	High	Validated and approved

40. Monitoring - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
40.-7-1	Detailed functional requirement	High	Validated and approved
40.-7-2	Detailed functional requirement	High	Validated and approved
40.-7-3	Detailed functional requirement	High	Validated and approved
40.-7-4	Detailed functional requirement	High	Validated and approved

41. Data Migration

41. Data Migration - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-1-1	Detailed functional requirement	High	Validated and approved
41.-1-2	Detailed functional requirement	High	Validated and approved
41.-1-3	Detailed functional requirement	High	Validated and approved
41.-1-4	Detailed functional requirement	High	Validated and approved

41. Data Migration - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-2-1	Detailed functional requirement	High	Validated and approved
41.-2-2	Detailed functional requirement	High	Validated and approved
41.-2-3	Detailed functional requirement	High	Validated and approved
41.-2-4	Detailed functional requirement	High	Validated and approved

41. Data Migration - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-3-1	Detailed functional requirement	High	Validated and approved
41.-3-2	Detailed functional requirement	High	Validated and approved
41.-3-3	Detailed functional requirement	High	Validated and approved
41.-3-4	Detailed functional requirement	High	Validated and approved

41. Data Migration - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-4-1	Detailed functional requirement	High	Validated and approved
41.-4-2	Detailed functional requirement	High	Validated and approved
41.-4-3	Detailed functional requirement	High	Validated and approved
41.-4-4	Detailed functional requirement	High	Validated and approved

41. Data Migration - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-5-1	Detailed functional requirement	High	Validated and approved
41.-5-2	Detailed functional requirement	High	Validated and approved
41.-5-3	Detailed functional requirement	High	Validated and approved
41.-5-4	Detailed functional requirement	High	Validated and approved

41. Data Migration - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-6-1	Detailed functional requirement	High	Validated and approved
41.-6-2	Detailed functional requirement	High	Validated and approved
41.-6-3	Detailed functional requirement	High	Validated and approved
41.-6-4	Detailed functional requirement	High	Validated and approved

41. Data Migration - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
41.-7-1	Detailed functional requirement	High	Validated and approved
41.-7-2	Detailed functional requirement	High	Validated and approved
41.-7-3	Detailed functional requirement	High	Validated and approved
41.-7-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy

42. Testing Strategy - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-1-1	Detailed functional requirement	High	Validated and approved
42.-1-2	Detailed functional requirement	High	Validated and approved
42.-1-3	Detailed functional requirement	High	Validated and approved
42.-1-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-2-1	Detailed functional requirement	High	Validated and approved
42.-2-2	Detailed functional requirement	High	Validated and approved
42.-2-3	Detailed functional requirement	High	Validated and approved
42.-2-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-3-1	Detailed functional requirement	High	Validated and approved
42.-3-2	Detailed functional requirement	High	Validated and approved
42.-3-3	Detailed functional requirement	High	Validated and approved
42.-3-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-4-1	Detailed functional requirement	High	Validated and approved
42.-4-2	Detailed functional requirement	High	Validated and approved
42.-4-3	Detailed functional requirement	High	Validated and approved
42.-4-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-5-1	Detailed functional requirement	High	Validated and approved
42.-5-2	Detailed functional requirement	High	Validated and approved
42.-5-3	Detailed functional requirement	High	Validated and approved
42.-5-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-6-1	Detailed functional requirement	High	Validated and approved
42.-6-2	Detailed functional requirement	High	Validated and approved
42.-6-3	Detailed functional requirement	High	Validated and approved
42.-6-4	Detailed functional requirement	High	Validated and approved

42. Testing Strategy - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
42.-7-1	Detailed functional requirement	High	Validated and approved
42.-7-2	Detailed functional requirement	High	Validated and approved
42.-7-3	Detailed functional requirement	High	Validated and approved
42.-7-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria

43. Acceptance Criteria - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-1-1	Detailed functional requirement	High	Validated and approved
43.-1-2	Detailed functional requirement	High	Validated and approved
43.-1-3	Detailed functional requirement	High	Validated and approved
43.-1-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-2-1	Detailed functional requirement	High	Validated and approved
43.-2-2	Detailed functional requirement	High	Validated and approved
43.-2-3	Detailed functional requirement	High	Validated and approved
43.-2-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-3-1	Detailed functional requirement	High	Validated and approved
43.-3-2	Detailed functional requirement	High	Validated and approved
43.-3-3	Detailed functional requirement	High	Validated and approved
43.-3-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-4-1	Detailed functional requirement	High	Validated and approved
43.-4-2	Detailed functional requirement	High	Validated and approved
43.-4-3	Detailed functional requirement	High	Validated and approved
43.-4-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-5-1	Detailed functional requirement	High	Validated and approved
43.-5-2	Detailed functional requirement	High	Validated and approved
43.-5-3	Detailed functional requirement	High	Validated and approved
43.-5-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-6-1	Detailed functional requirement	High	Validated and approved
43.-6-2	Detailed functional requirement	High	Validated and approved
43.-6-3	Detailed functional requirement	High	Validated and approved
43.-6-4	Detailed functional requirement	High	Validated and approved

43. Acceptance Criteria - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
43.-7-1	Detailed functional requirement	High	Validated and approved
43.-7-2	Detailed functional requirement	High	Validated and approved
43.-7-3	Detailed functional requirement	High	Validated and approved
43.-7-4	Detailed functional requirement	High	Validated and approved

44. Release Plan

44. Release Plan - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-1-1	Detailed functional requirement	High	Validated and approved
44.-1-2	Detailed functional requirement	High	Validated and approved
44.-1-3	Detailed functional requirement	High	Validated and approved
44.-1-4	Detailed functional requirement	High	Validated and approved

44. Release Plan - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-2-1	Detailed functional requirement	High	Validated and approved
44.-2-2	Detailed functional requirement	High	Validated and approved
44.-2-3	Detailed functional requirement	High	Validated and approved
44.-2-4	Detailed functional requirement	High	Validated and approved

44. Release Plan - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-3-1	Detailed functional requirement	High	Validated and approved
44.-3-2	Detailed functional requirement	High	Validated and approved
44.-3-3	Detailed functional requirement	High	Validated and approved
44.-3-4	Detailed functional requirement	High	Validated and approved

44. Release Plan - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-4-1	Detailed functional requirement	High	Validated and approved
44.-4-2	Detailed functional requirement	High	Validated and approved
44.-4-3	Detailed functional requirement	High	Validated and approved
44.-4-4	Detailed functional requirement	High	Validated and approved

44. Release Plan - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-5-1	Detailed functional requirement	High	Validated and approved
44.-5-2	Detailed functional requirement	High	Validated and approved
44.-5-3	Detailed functional requirement	High	Validated and approved
44.-5-4	Detailed functional requirement	High	Validated and approved

44. Release Plan - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-6-1	Detailed functional requirement	High	Validated and approved
44.-6-2	Detailed functional requirement	High	Validated and approved
44.-6-3	Detailed functional requirement	High	Validated and approved
44.-6-4	Detailed functional requirement	High	Validated and approved

44. Release Plan - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
44.-7-1	Detailed functional requirement	High	Validated and approved
44.-7-2	Detailed functional requirement	High	Validated and approved
44.-7-3	Detailed functional requirement	High	Validated and approved
44.-7-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan

45. Resource Plan - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-1-1	Detailed functional requirement	High	Validated and approved
45.-1-2	Detailed functional requirement	High	Validated and approved
45.-1-3	Detailed functional requirement	High	Validated and approved
45.-1-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-2-1	Detailed functional requirement	High	Validated and approved
45.-2-2	Detailed functional requirement	High	Validated and approved
45.-2-3	Detailed functional requirement	High	Validated and approved
45.-2-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-3-1	Detailed functional requirement	High	Validated and approved
45.-3-2	Detailed functional requirement	High	Validated and approved
45.-3-3	Detailed functional requirement	High	Validated and approved
45.-3-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-4-1	Detailed functional requirement	High	Validated and approved
45.-4-2	Detailed functional requirement	High	Validated and approved
45.-4-3	Detailed functional requirement	High	Validated and approved
45.-4-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-5-1	Detailed functional requirement	High	Validated and approved
45.-5-2	Detailed functional requirement	High	Validated and approved
45.-5-3	Detailed functional requirement	High	Validated and approved
45.-5-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-6-1	Detailed functional requirement	High	Validated and approved
45.-6-2	Detailed functional requirement	High	Validated and approved
45.-6-3	Detailed functional requirement	High	Validated and approved
45.-6-4	Detailed functional requirement	High	Validated and approved

45. Resource Plan - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
45.-7-1	Detailed functional requirement	High	Validated and approved
45.-7-2	Detailed functional requirement	High	Validated and approved
45.-7-3	Detailed functional requirement	High	Validated and approved
45.-7-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate

46. Cost Estimate - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-1-1	Detailed functional requirement	High	Validated and approved
46.-1-2	Detailed functional requirement	High	Validated and approved
46.-1-3	Detailed functional requirement	High	Validated and approved
46.-1-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-2-1	Detailed functional requirement	High	Validated and approved
46.-2-2	Detailed functional requirement	High	Validated and approved
46.-2-3	Detailed functional requirement	High	Validated and approved
46.-2-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-3-1	Detailed functional requirement	High	Validated and approved
46.-3-2	Detailed functional requirement	High	Validated and approved
46.-3-3	Detailed functional requirement	High	Validated and approved
46.-3-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-4-1	Detailed functional requirement	High	Validated and approved
46.-4-2	Detailed functional requirement	High	Validated and approved
46.-4-3	Detailed functional requirement	High	Validated and approved
46.-4-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-5-1	Detailed functional requirement	High	Validated and approved
46.-5-2	Detailed functional requirement	High	Validated and approved
46.-5-3	Detailed functional requirement	High	Validated and approved
46.-5-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-6-1	Detailed functional requirement	High	Validated and approved
46.-6-2	Detailed functional requirement	High	Validated and approved
46.-6-3	Detailed functional requirement	High	Validated and approved
46.-6-4	Detailed functional requirement	High	Validated and approved

46. Cost Estimate - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
46.-7-1	Detailed functional requirement	High	Validated and approved
46.-7-2	Detailed functional requirement	High	Validated and approved
46.-7-3	Detailed functional requirement	High	Validated and approved
46.-7-4	Detailed functional requirement	High	Validated and approved

47. Risks

47. Risks - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-1-1	Detailed functional requirement	High	Validated and approved
47.-1-2	Detailed functional requirement	High	Validated and approved
47.-1-3	Detailed functional requirement	High	Validated and approved
47.-1-4	Detailed functional requirement	High	Validated and approved

47. Risks - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-2-1	Detailed functional requirement	High	Validated and approved
47.-2-2	Detailed functional requirement	High	Validated and approved
47.-2-3	Detailed functional requirement	High	Validated and approved
47.-2-4	Detailed functional requirement	High	Validated and approved

47. Risks - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-3-1	Detailed functional requirement	High	Validated and approved
47.-3-2	Detailed functional requirement	High	Validated and approved
47.-3-3	Detailed functional requirement	High	Validated and approved
47.-3-4	Detailed functional requirement	High	Validated and approved

47. Risks - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-4-1	Detailed functional requirement	High	Validated and approved
47.-4-2	Detailed functional requirement	High	Validated and approved
47.-4-3	Detailed functional requirement	High	Validated and approved
47.-4-4	Detailed functional requirement	High	Validated and approved

47. Risks - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-5-1	Detailed functional requirement	High	Validated and approved
47.-5-2	Detailed functional requirement	High	Validated and approved
47.-5-3	Detailed functional requirement	High	Validated and approved
47.-5-4	Detailed functional requirement	High	Validated and approved

47. Risks - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-6-1	Detailed functional requirement	High	Validated and approved
47.-6-2	Detailed functional requirement	High	Validated and approved
47.-6-3	Detailed functional requirement	High	Validated and approved
47.-6-4	Detailed functional requirement	High	Validated and approved

47. Risks - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
47.-7-1	Detailed functional requirement	High	Validated and approved
47.-7-2	Detailed functional requirement	High	Validated and approved
47.-7-3	Detailed functional requirement	High	Validated and approved
47.-7-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap

48. Future Roadmap - Detailed Requirement Area 1

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-1-1	Detailed functional requirement	High	Validated and approved
48.-1-2	Detailed functional requirement	High	Validated and approved
48.-1-3	Detailed functional requirement	High	Validated and approved
48.-1-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap - Detailed Requirement Area 2

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-2-1	Detailed functional requirement	High	Validated and approved
48.-2-2	Detailed functional requirement	High	Validated and approved
48.-2-3	Detailed functional requirement	High	Validated and approved
48.-2-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap - Detailed Requirement Area 3

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-3-1	Detailed functional requirement	High	Validated and approved
48.-3-2	Detailed functional requirement	High	Validated and approved
48.-3-3	Detailed functional requirement	High	Validated and approved
48.-3-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap - Detailed Requirement Area 4

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-4-1	Detailed functional requirement	High	Validated and approved
48.-4-2	Detailed functional requirement	High	Validated and approved
48.-4-3	Detailed functional requirement	High	Validated and approved
48.-4-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap - Detailed Requirement Area 5

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-5-1	Detailed functional requirement	High	Validated and approved
48.-5-2	Detailed functional requirement	High	Validated and approved
48.-5-3	Detailed functional requirement	High	Validated and approved
48.-5-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap - Detailed Requirement Area 6

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-6-1	Detailed functional requirement	High	Validated and approved
48.-6-2	Detailed functional requirement	High	Validated and approved
48.-6-3	Detailed functional requirement	High	Validated and approved
48.-6-4	Detailed functional requirement	High	Validated and approved

48. Future Roadmap - Detailed Requirement Area 7

This section defines detailed business rules, workflows, user stories, acceptance criteria, validations, audit requirements, reporting requirements, security controls, API considerations, UI expectations, and operational procedures. The AP Media platform supports evidence-based publishing, AI-assisted verification, hierarchical governance, multilingual experiences, wallet operations, sponsorships, advertisements, investigations, community participation, and digital democracy.

Requirement ID	Description	Priority	Acceptance Criteria
48.-7-1	Detailed functional requirement	High	Validated and approved
48.-7-2	Detailed functional requirement	High	Validated and approved
48.-7-3	Detailed functional requirement	High	Validated and approved
48.-7-4	Detailed functional requirement	High	Validated and approved
