

AP MEDIA APPLICATION DEVELOPMENT PROJECT

Enterprise Software Requirements Document (Detailed Master SRD)

Executive Summary

AP Media is a next-generation AI-powered verified information, media, social networking, investigation, civic participation, governance, sponsorship, and digital democracy platform.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Vision

Build the world's most trusted evidence-driven media ecosystem.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Business Goals

Democratize journalism, support fact-based reporting, community participation, and sustainable media monetization.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Stakeholders

Citizens, Reporters, Investigators, Businesses, NGOs, Governments, Educational Institutions, Advertisers, Sponsors.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Supported Platforms

Android, iOS, Web, PWA, Smart TV, Future Connected Devices.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

User Roles & Hierarchy

Public User, Registered User, Verified User, Creator, Reporter, Bureau, Moderator, Editor, Manager, Sub Admin, Admin, Super Admin.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Trust & Value System

Dynamic trust scoring using accuracy, verification, public service, qualifications and community trust.

Functional Requirements:

- Detailed workflows

- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

News Ecosystem

Breaking news, local, national, international, surrounding news, e-papers, live news, press notes and official announcements.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Society Social Network

User generated content with images, videos, audio, documents, discussions and communities.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Teasers Platform

Short-form video ecosystem with creator tools, monetization and AI enhancements.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

MUChat

Secure messaging, communities, groups, media sharing and business communication.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Investigation Platform

Complaint intake, IR tracking, evidence collection, legal review, investigator workflow and publication control.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

INVIGIL

Fact verification, evidence center, vigilance, personal security, family security and investigation tools.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Advertising Platform

Self-service ads, campaign management, targeting, analytics and payments.

Functional Requirements:

- Detailed workflows
- Role-based access controls

- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Sponsorship Ecosystem

Transparent sponsorships for journalists, NGOs, causes, institutions and creators.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Wallet & Payments

Rewards, sponsorships, donations, subscriptions, event revenue and creator earnings.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

AI Ecosystem

AI newsroom, AI anchors, AI presenters, AI translation, AI verification, AI moderation and recommendation engines.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Analytics

Executive dashboards, trust analytics, misinformation analytics, geographic analytics and governance analytics.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Mobile UX

Premium design, stories/scenes, personalized feeds, creator center and feature hub.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Web Platform

Responsive portal with advanced navigation and productivity features.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Smart TV

AI anchors, live news, debates, investigations and regional channels.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging

- Analytics tracking
- API support
- Mobile/Web/TV support

Security

Zero Trust, MFA, RBAC, ABAC, encryption, audit trails and threat detection.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Architecture

Microservices, APIs, event-driven architecture, AI services and cloud-native deployment.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Technology Stack

Flutter, React, Next.js, Python, FastAPI, PostgreSQL, MongoDB, Redis, Elasticsearch, Vector DBs, AWS/Azure/GCP.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Roadmap

Foundation, Media, Investigations, Monetization, AI Expansion, Global Scale.

Functional Requirements:

- Detailed workflows
- Role-based access controls
- Audit logging
- Analytics tracking
- API support
- Mobile/Web/TV support

Comprehensive Module Breakdown

Authentication & Identity

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

User Management

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Reporter Management

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Content Management

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Newsroom

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Fact Verification

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Investigations

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Evidence Center

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Debates

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Polls

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Podcasts

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Events

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Communities

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

MUChat

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Wallet

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Sponsorships

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Advertising

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Marketplace

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Jobs

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Courses

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Government Services

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Analytics

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

AI Services

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Notifications

Objectives, workflows, permissions, APIs, reports, dashboards, KPIs, security controls, and acceptance criteria shall be defined for this module.

Database Domains

Users, Roles, Permissions, Content, News, Media Assets, Investigations, Evidence, Wallets, Transactions, Ads, Sponsorships, Organizations, Communities, Messages, Analytics, AI Logs, Audit Logs.

Non Functional Requirements

99.95% availability, multilingual support, scalability to millions of users, observability, disaster recovery, accessibility, privacy, compliance and security.
